

Facilitator Meeting #1 (Group 8)

≡ Agenda	• Initial facilitator check-in. • Discuss project progress. • Clarify expectations for deliverables. • Address team questions. • Plan recurring facilitator meetings.
📅 Date	August 1, 2026

Date: 1 August 2026

Time: 4:30 PM – 5:00 PM (30 minutes)

Facilitator: Karla Ivkovic

Attendees:

- Karla Ivkovic
- Sandra Franco Pynadath
- Shravan Suresh Kumar
- Karthikeya Bezwada
- Junlong Huang
- Lizhou Xiong

Discussion Summary

1. Facilitator Meetings

- Facilitator check-in meetings will occur **every two weeks** throughout the semester.
- Meetings are intended to review progress, answer questions, and provide guidance.
- Team agreed to meet the facilitator on Tuesdays alongside their regular project meetings.
- Initial facilitator meetings will be conducted online before moving to in-person sessions if possible.

2. Client Progress

The team informed the facilitator that:

- The first client meeting had already taken place.
- Initial project requirements have been received.
- The client requested the team define individual member roles before the next meeting.
- The client is currently using **Squarespace**, but is open to alternative platforms if the team can justify a better solution.

3. Deliverables (D1)

Discussion covered:

- No official template currently exists for Deliverable 1.
 - The facilitator recommended contacting the unit coordinator (Bruce) regarding any available template.
 - Teams should not rely solely on templates but instead ensure they satisfy the rubric requirements.
-

4. Working Alongside Another Group

The facilitator clarified that:

- Another group is working on the same client project.
 - Both groups are expected to develop **independent solutions**.
 - Different approaches are acceptable provided client requirements are met.
-

5. Selecting a Website Platform

Advice provided:

- Choose a platform that:
 - suits the client's technical ability,
 - is manageable for the team's technical skills,
 - can realistically be delivered within the semester.
-

6. Project Planning

The facilitator emphasised:

- Begin gathering and documenting requirements early.
 - Meet with the client regularly.
 - Keep the client informed as requirements evolve.
 - Avoid leaving major work until the end of semester.
-

7. Managing Client Requirements

Important guidance:

- D1 should clearly define the agreed project scope.
 - Ensure the client approves the documented requirements.
 - Deliverables in Week 12 should match what was committed in D1.
 - Additional features may be added later if time permits, but the agreed minimum scope must be completed.
-

8. Team Roles

Discussion included:

Suggested project roles:

- Project Manager
- Front-end Developer
- Back-end Developer
- Other technical roles based on project needs

Additional advice:

- Consider rotating the Project Manager role, or appoint one member if appropriate.
 - Assign responsibilities according to technical skills and availability.
 - Assess team members' strengths before allocating technical tasks.
-

9. GitHub

Recommendations:

- Add the facilitator as a collaborator.
- Configure GitHub professionally.
- Use branch protection and pull request approvals where appropriate.
- Apply GitHub workflow practices learned in Agile Web Development.
- Remember the client may eventually receive access to the repository hence be mindful.

10. Class Test

The facilitator advised:

- The class test is expected to cover workshop content and guest lectures.
- Further details will likely be provided by the unit coordinator.

11. Accountability Document

Discussion points:

- Accountability documents should be submitted weekly.
- Their purpose is to help keep the team accountable and on track.

12. Internal Meetings

The team confirmed:

- Internal meetings are scheduled every **Tuesday at 1:00 PM**, before the lecture.
- Client meetings are also generally scheduled on Tuesdays.

13. Documentation

The facilitator requested:

- Access to the team's GitHub repository.
- Access to the shared document repository (OneDrive, Google Drive, or Teams).
- Meeting minutes should be recorded for **all internal, client, and facilitator meetings**.

Action Items

Action	Owner	Due
Finalise individual team roles	Group 8	Before next client meeting
Contact Bruce regarding D1 template (if required)	Team	ASAP
Decide on website platform (Squarespace vs alternatives)	Team	Before design work begins
Finalise D1 requirements with client	Team	Prior to D1 submission
Meet client regularly throughout semester	Team	Ongoing
Add facilitator to GitHub repository	Team	ASAP
Share OneDrive/Google Drive/Teams workspace with facilitator	Team	ASAP
Schedule recurring facilitator meetings every two weeks	Team	Before next meeting
Submit accountability document weekly	Team	Weekly
Record meeting minutes for all meetings	Team	Ongoing
